

INNOVATION ENGINEER – MEDTECH

Posted on 26 mars, 2025

Company Name NSK Nordic

Location Göteborg

Job Description

As an Innovation Engineer you manage all product development activities, change- and improvement projects and you are technically responsible for our products. You will work in close cooperation with the R&D Director who is also the founder of Integration Diagnostics.

In this position your daily work has a wide scope and is conducted in a dynamic, innovative international working environment.

The role includes

- Hands-on development of dental medical devices
- Running development projects, new products and product changes
- Interactions with partners and customers
- Cooperation with our Japanese owner

Qualifications

- Engineering background with knowledge about electronics and embedded software
- Good knowledge about medical device development
- Fluent in English and at least conversational Swedish

To succeed in this role, you are a user- and patient centric person with a strong drive to provide innovative products and learn and understand the needs of the dental implant community. You have a broad technical interest, and you can navigate in both hardware and software development.

You will be part of an exciting and challenging journey shaping the company's future and taking the business to new heights. In this role you will have a great opportunity to make an impact and improve the products and solutions we supply to the market, and you will have a big variation in activities.

Application

This recruitment is managed by our recruitment partner, Moveup Consulting AB. To apply, please send your CV to Tom Bergqvist at tom.bergqvist@moveup.se

If you have questions regarding Integration Diagnostics or this open position, please contact Tom at +46 733 87 27 22 or tom.bergqvist@moveup.se.

By submitting your application, you also consent to us storing your personal data, including CV & cover letter and that we have the right to share this information with third parties (our client). You can revoke the consent whenever you want.

Om företag

Integration Diagnostics and its core products, Penguin RFA and Osseo100 measures dental implant stability to enable clinicians to decide when to load an implant. The technique has been developed in close cooperation with clinicians and experts in the field of dental implantology.

In 2018, Integration Diagnostics became part of the Japanese company Nakanishi Inc. Nakanishi Inc., is a world-leading company of professional dental instruments with the world's top-share brand "NSK". NSK's global marketing network covers 135+ countries around the world.

NSK Nordic, one of the 16 global offices, works closely with a quality authorised reseller network to deliver factory direct expertise, innovative product solutions and technical support to the dental industry throughout the Nordic countries.
