

MEDICAL SCIENCE LIAISON (MSL) STOCKHOLM/NORTH

Posted on 13 mars, 2024

Company Name Bioarctic

Location Stockholm/Uppsala

Job Description

Join Our Team as a Medical Science Liaison (MSL) for Stockholm and north Sweden!

Are you attracted by the opportunity to be part of **BioArctic's** exciting journey with the ambition to improve the quality of life for patients with neurodegenerative diseases?

Do you want to have the chance to drive the implementation of a new drug in Alzheimer's disease, and providing invaluable support to health care in the creation of a completely new patient journey? Do you thrive on building lasting relationships with external stakeholders and work together in a dynamic cross-functional team? If so, this role is perfect for you!

Why Join Us?

- **Impactful Work:** As a Medical Science Liaison, you'll play a pivotal role in fostering scientific relations with Health Care Professionals (HCPs) in the Alzheimer's disease arena. Your efforts will directly contribute to enhancing patient care and advancing our mission to combat this challenging condition.
- **Collaborative Environment:** You'll work closely with cross-functional colleagues to deliver comprehensive support and drive impactful scientific communication and educational initiatives within your assigned region.

Your Responsibilities:

- Build "peer-to-peer" relationships and act as scientific resource and go-to-person for HCPs in the Alzheimer's disease area regarding scientific queries and in-depth scientific information related to Alzheimer's disease and treatment.
- Responsibility for regional scientific educational activities.
- Work in close collaboration with Key Account Managers and Regional Market Access in the joint BioArctic and co-promotion partner Eisai regional In-Field team to achieve common goals.
- Identify gaps in the patient journey, including patient care, diagnostic requirements and

procedures, and bottlenecks in the healthcare system and create plans to mitigate them.

- Feedback knowledge from KOLs to the company for optimal life-cycle management.
- Support initiation and implementation of medical projects, including phase IV studies and RWE studies.
- Support other field-based staff at meetings and with relevant medical training when required.
- Demonstrate and inspire the behaviors that reinforce BioArctic's core values (Respect, Engagement, Collaboration, Responsibility)

What We're Looking For:

- **Educational Excellence:** A Master's degree in medical, pharmaceutical, or natural sciences is preferred, along with a demonstrated ability to present scientific data effectively. A PhD in medical, pharmaceutical or natural sciences is advantageous. Alternatively, relevant clinical education (e.g. nurse, psychologist) could also be suitable. Background in CNS diseases, particularly Alzheimer's disease, is a plus.
- **Industry Experience:** Previous experience in the pharmaceutical industry, particularly within Medical Affairs, is highly desirable. Previous experience with both smaller biotech companies and big pharma companies is also a plus.
- **Strong Communicator:** Proficiency in both Swedish and English, coupled with skills in digital communication tools, is essential for success in this role.
- **Other:**

-Certification or training in ethical regulations for pharmaceutical promotion, coupled with an understanding of healthcare systems and development of therapy area-specific guidelines.

-Interaction with stakeholders, such as payers, KOLs, patient associations.

-Cooperation with other pharmaceutical companies, for example as co-promotion.

-Documented business acumen.

-Experience from running/supporting clinical studies with a focus on RWE and phase 4.

Additional Details:

- **Field-Based Role:** This position requires frequent travel, up to 80% of the working time, to engage with healthcare professionals across the region.
- **Driving License Required:** A valid driving license is necessary for this role.
- You are living in the Stockholm/Uppsala region.

If you're ready to make a meaningful impact in the Alzheimer's disease field and contribute to innovative healthcare solutions, we invite you to join our team as a Medical Science Liaison in Sweden. Apply now and be a part of our mission to transform lives through science and collaboration!

This recruitment is handled by our recruitment partner, Moveup Consulting AB. To apply, please send your CV and a cover letter as soon as possible to richard.etz@moveup.se

By submitting your application, you also consent to us storing your personal data, including CV & cover letter and that we have the right to share this information with third parties (our client). You can revoke the consent whenever you want.

Om företag

BioArctic AB (publ) is a research-intensive biopharmaceutical company that, together with its partner Eisai, has developed Leqembi® (lecanemab) – the world's first drug to slow the progression of the disease and reduce cognitive impairment in early Alzheimer's disease.

In addition to royalties on global sales, BioArctic has the right to commercialize lecanemab in the Nordic market together with Eisai. BioArctic has a broad research portfolio with antibodies against neurodegenerative diseases such as Parkinson's disease and ALS as well as additional projects against Alzheimer's disease.

BioArctic's B share (BIOA B) is listed on Nasdaq Stockholm Large Cap. For further information, please visit www.bioarctic.se.
