

QUALITY ASSURANCE ENGINEER - PRODUCT LIFECYCLE

Posted on 8 juni, 2021

Company Name Neoss

Location Göteborg

Job Description

Quality is the cornerstone of a responsible, ethical and committed company. Quality assurance forms a key part of the organisation reflecting in all areas in which Neoss® operates.

Neoss, as a designer and manufacturer of dental implants, dental membranes, accessories, instruments and CAD/CAM, is committed to delivering satisfaction to our customers by anticipating their needs and offering value, quality, and reliability that exceeds their expectations.

The success of Neoss and our customers is powered by our people, a culture of teamwork, innovative solutions, and by continually improving the effectiveness of our Quality System as a foundation for business performance.

We value safety, integrity and mutual respect, supporting our employees, communities and customers, complying with all applicable laws and regulations.

Are you committed to quality and interested in design control? And do you want to make a difference in the quality of life of dental implant patients? Then, you are welcome to join us as our new Quality Assurance Engineer – Product lifecycle.

The key responsibilities of the role

You will be involved in setting up and maintain production quality of all our medical devices by securing that activities are well defined, planned, documented and executed according to Medical Device standards and regulations. All in close collaboration with internal and external partners.

- Technology transfer between Neoss R&D and suppliers.
- Primary contact and support for supplier's production and inspection.
- Technical quality support for non-conformities during the entire product lifecycle.
- Develop specifications and project documentation for the existing product line.
- Manage design change reports (design control) incl technical investigations for the existing product line.
- Responsible for in-coming inspection and inspection material used at suppliers.

- Represent production control during external audits.
- Support in supplier audit plan.

Your background

You have an academic degree and experience from Quality Assurance in manufacturing or product development, preferably within precision engineering. Previous experience from inspection and from updating technical documentation is required. Some experience from medical devices- or pharmaceutical industry would be beneficial. Your English is fluent (both written and spoken).

What can we offer you

Neoss has a strong commitment to Quality and an experienced R&D team. For us, quality is the cornerstone of a responsible, ethical and committed company. Quality assurance forms a key part of the organisation reflecting in all areas in which Neoss® operates. Your colleagues are all highly skilled professionals with a profound industry knowledge. We are proud to recognise our employee's contributions to the success of the business, many of whom are celebrating over 10 years of service. It is this combination of dedication and attitude that sparks the ability to be innovative and develop products to improve the treatment of patients the world over. You will join a truly international company with high ambitions for growth.

To apply

We are looking forward to receiving your application (in English) as soon as possible or at the latest on the **18 June**. Selection and interviews are ongoing, so hurry up, the position may be assigned earlier. For more information about Neoss, the role and to apply, please contact Tom Bergqvist at (0)733 87 27 22.

CV and Cover should be sent by e-mail to: tom.bergqvist@moveup.se

We are looking forward to hearing from you!

By submitting your application you also give your consent to storing your personal information, including CV & Cover letter, and that we own the right to share this information with third parties (our client). You can withdraw the consent at any time

Om företag

Neoss® was founded in 2000, with the objective of "Advancing the Science of Dental Implant

Treatment", by Fredrik Engman, Neoss Chief Technology Officer, and Professor Neil Meredith. Convinced that existing implant systems were too complex, their idea was to create a much simpler and more rationalized solution. Through persistent effort and close collaborations they created a high-quality, optimized implant system. With a limited number of components, the Neoss Implant System has unique design features and a host of excellent advantages for everyone. Leading the market with ingenuity and integrity, we strive to set new standards. In developing smart treatment solutions and working closely with each practice, Neoss makes the complex less complicated. We call that Intelligent Simplicity.

Since its foundation, Neoss continues to innovate and invest in research and product development: designing, manufacturing and selling products of the highest quality which offer market-leading functionality. Neoss implants, manufactured in Sweden, are protected by a number of significant patents including patents covering the NeoLoc® Implant-Abutment connection and the Neoss ProActive® surface which can be found on all current Neoss implants, as signified by the names ProActive Straight Implant and ProActive Tapered Implant.
