

R&D MANAGER

Posted on 12 oktober, 2021

Company Name Doxa AB

Location Uppsala

Job Description

As our new R&D Manager you manage all our product development activities. Together with internal and external expert groups you head the scientific development. You ensure that all documentation, in particular the Technical File, is created and updated in the projects.

Considering Doxa is a small company we expect the R&D Manager to be an operational and a "hands-on person" who can really make things happen. Some previous experience from a people management position would be an advantage but is not mandatory. You will manage only a small team of colleagues.

You work in close collaboration with our QA/RA Manager, Production Manager and the Managing Director. When needed, you support complaints handling and vigilance reporting.

Qualifications

- University Degree, preferably in material sciences (bioceramics/biomaterials)
- Experience in medical devices product development, preferably with dental materials.
- Fluent in written and spoken English
- Technical documentation skills

We are looking for a team-player but also you must be an individual contributor in a fast-paced, changing environment. Most certainly you are very well used to handling/updating documentation during the project progress. To be successful in this position you must have an innovative capability together with strong technical understanding (material sciences). It's important also that you can navigate in the medical device regulatory environment.

To apply

This recruitment is handled by our recruitment partner, Moveup Consulting AB. To apply, please send your CV and a cover letter to Tom Bergqvist at: tom.bergqvist@moveup.se

If you have any questions regarding Doxa or this open position, feel free to contact Tom Bergqvist at +46 733 87 27 22

By submitting your application, you also consent to us storing your personal data, including CV & cover letter and that we have the right to share this information with third parties (our client). You can revoke the consent whenever you want.

Om företag

Doxa is an Uppsala, Sweden based company group that develops, manufactures and commercializes bioceramic dental materials. With an extensive patent portfolio, Doxa today is a world leader in the development of proprietary bioceramic technologies. Doxa's flagship product, Ceramir® Crown & Bridge Cement, is the first of a series of planned bioceramic dental materials from Doxa. In Uppsala, we conduct product development as well as production of the materials. Together with our suppliers, we refine these materials into the final product. The products are sold via distributors in e.g. a USA, Japan and Europe. As we manufacture medical technology products, operations are regulated and the company quality system is crucial for all functions.
