

SENIOR PROJECT MANAGER

Posted on 12 juli, 2023

Company Name OnDosis

Location Göteborg

Job Description

Innovation in Pharmaceutical development and Digital health has accelerated, but the way of dosing medicines to patients has stayed the same. The demand for reinvented dosing is at an all-time high. At OnDosis, we believe it is time that dosing of medicines catches up to the scientific advances of modern medicine. And we're about to make it happen.

*Are you a curious and committed person who is driven by the opportunity to work with a great entrepreneurial team of senior professionals, and to take on great responsibility? Do you want to be part of reinventing the dosing of medicines and connect traditional drug-based therapies with Digital health? Then this job as **Senior Project Manager** is for you.*

Senior Project Manager

As a Senior Project Manager, you are responsible for providing cross-functional project management from product definition to regulatory submission and industrialisation of device constituent parts of drug-device combination products. You plan and coordinate all project team activities, effectively leading teams of internal and external cross-functional resources to deliver set milestones and complete projects on time and within budget. As part of OnDosis PMO you will also play an important role in evolving ways of working to further strengthen our ability to deliver multiple development projects end-to-end.

Your responsibilities

- Planning and coordination of project team activities
- Defining, monitoring and managing project budget
- Identifying and managing project risks
- Resource management within project team
- Tracking and communicating overall project progress to management and other stakeholders
- Working closely with partnering pharmaceutical companies to secure integration between device and drug constituent parts of drug-device combination products

- Contribute to strengthen OnDosis PMO areas of expertise

Who are we looking for?

We are looking for talented professionals with passion and drive. You are driven by impacting status quo and challenging systems. You have a sixth sense to make things happen, and you love to contribute to bring technology innovations to customers to create value.

You exhibit authentic leadership while interacting with both internal and external stakeholders. You are a team player with strong communication skills in English.

Last but not least, you have an excellent understanding of complex projects involving medical devices and/or drug-device combination products through all phases of device development to commercialisation. Preferably, but not necessarily, you have experience from connected health devices/services.

Essential for the role

- Project management experience from complex projects involving medical devices and/or drug-device combination products, through all faces of device development to commercialisation
- Knowledge of relevant regulations, international standards and guidelines, such as ISO 13485, ISO 14971, MDD, MDR, CFR Part 820, and excellent understanding of design control principles
- Decision making and prioritising ability
- Excellent communication in English (oral and written)

Desirable

- Experience from drug-device combination products
- Experience of connected health devices/services

Why OnDosis?

You will have a great opportunity to join early in a growing company on the global arena with big and bold ambitions. Our clients are large multinational pharmaceutical companies. Your colleagues are all highly skilled professionals with in-depth industry knowledge. The commitment to establishing a new standard for the dosing and administration of medicines is present in everything

we do. There is no doubt you will be part of an exciting journey on the global pharma- and medical devices arena where you will have the opportunity to make an impact. You will be part of OnDosis PMO and will be an important player to further evolve our ways of working to ensure the route to realisation of our bold ambitions.

Om företag

OnDosis is a Swedish Life Science company that develops intelligent solutions to deliver and administer individualized medication. By combining first-class pharmaceuticals with digital technology, we create a new, user-friendly way of taking medicine that optimizes the benefits of prescribed therapies as well as patient compliance.

OnDosis will revolutionize the way we take our medicines through integration with intelligent dosing and health technology to improve patient outcomes across a multitude of diseases.

While pharmaceutical innovation has accelerated, dosing has stayed the same, resulting in a great number of unmet needs. Today, the calls for change are at an all-time high—and our revolution will ensure that dosing catches up with the scientific advances of modern medicine and digital therapeutics.
