

SENIOR PROJECT MANAGER

Posted on 22 september, 2020

Company Name OnDosis

Location Göteborg

Job Description

Innovation in Pharmaceutical development and Digital health has accelerated, but the way of dosing medicines to patients has stayed the same. The demand for reinvented dosing is at an all-time high. At OnDosis, we believe it is time that dosing of medicines catches up to the scientific advances of modern medicine. And we're about to make it happen.

*Are you a curious and committed person who is driven by the opportunity to work with a great entrepreneurial team of senior professionals, and to take on great responsibility? Do you want to be part of reinventing the dosing of medicines and connect traditional drug-based therapies with Digital health? Then this new job as our **Senior Project Manager** is for you.*

Senior Project Manager

As a Senior Project Manager, you are responsible for providing cross-functional project management from product definition to regulatory submission and industrialisation of device constituent parts of drug-device combination products. You plan and coordinate all project team activities, effectively leading teams of internal and external cross-functional resources to deliver set milestones and complete projects on time and within budget.

Your responsibilities include:

- Defining, monitoring and managing project budget.
- Identifying and managing project risks.
- Resource management within project team.
- Tracking and communicating overall project progress to management and other stakeholders.
- Working closely with partnering pharmaceutical companies to secure integration between device and drug constituent parts of drug-device combination products.

Are you the one we are looking for?

We are looking for talented professionals with passion and drive. You are driven by impacting status

quo and challenging systems. You have a sixth sense to make things happen, fast, and you love technology. We value a background from other roles in medical devices or pharmaceutical industry, such as product development, quality assurance or regulatory affairs. Preferably, but not necessarily, you have experience from drug-device combination products, connected health devices/services and some working experience of risk management.

As a Senior Project Manager, you have:

- Project management experience from complex projects involving medical devices and/or drug-device combination products, through all faces of device development to commercialisation.
- Knowledge of relevant regulations, international standards and guidelines, such as ISO 13485, ISO 14971, MDD, MDR, CFR Part 820, and excellent understanding of design control principles.
- Decision making and prioritising ability.
- Excellent communication in English (oral and written).

What can OnDosis offer you?

You will have a great opportunity to join early and develop in a company which acts on the global arena with really high ambitions. Our clients are large multinational pharmaceutical companies. Your colleagues are all highly skilled professionals with a profound industry knowledge. The commitment to establish a new standard for the dosing of medicines is present in everything we do. For sure, you will be part of an exciting growth journey on the global pharma- and medical devices arena.

Om företag

Founded as a spin-out from AstraZeneca in 2017, **OnDosis** is a Swedish start-up addressing one of the

major opportunities in healthcare; personalized dosage of medicines. The proprietary technology platform is centered around a connected handheld dosing device that delivers tailored doses of oral medicines. By combining individual dosing of traditional drug-based medicines augmented by digital therapeutics, OnDosis opens a new chapter in personalized medicine where the mission is to improve patients' life through delivering the perfect dosage; individualized, intuitive, and intelligent. OnDosis is based in the AZ BioVenturehub in Mölndal, Sweden.
